

New faces at dental practice are certain to bring a smile

MONKMOOR Dental Practice in Shrewsbury has received an injection of new ideas and energy since it was taken over by Dr Amit Jutla in August 2013.

Dr Jutla graduated from Bart's and The London School of Medicine and Dentistry in 2006. Since then he has worked in some of the most prestigious dental practices in the West Midlands.

In order to pursue his passion for dentistry, he has continued to commit to professional development and has spent several years furthering his education. In 2008 he became principal dentist at The Priory Dental Practice in Walsall, which under Dr Jutla's leadership has been awarded the Good Practice Award by the British Dental Association – a testament to the high standards achieved.

In 2012 Dr Jutla became the youngest dentist in the West Midlands to become a vocational trainer and in this role has since supported a number of young graduate den-

tists in their first year in practice. Dr Jutla's interest in orthodontics has led him to complete a Certificate in Orthodontics at Warwick University and he plans to go back to complete the remaining two years to work towards an MSC in Orthodontics. In addition, in order to reinforce his commitment to being a vocational trainer he is currently studying to complete a Postgraduate Certificate in Medical Education.

Under its new ownership, Monkmoor Dental Practice has been refurbished to exemplary standards, with new technology such as digital X-rays being introduced and a fully-computerised system replacing the former manual paper records. In addition, three new dental chairs have been installed in order to ensure that patients receive the best possible care and service during their treatment.

With two other experienced dentists supporting Dr Jutla, the practice provides a calm, relaxed environment for the provision of the full range of general dental services for all the family, with on-site parking and disabled facilities

available. There is a focus on meeting patients' requirements and Dr Jutla has committed to offering services such as Invisalign clear aligners, tooth whitening and cosmetic dentistry in response to patients' needs.

Free consultations are available to patients interested in Invisalign clear aligners. Invisalign is a revolutionary treatment which uses a series of nearly invisible aligners to move teeth to a more cosmetically pleasing position, thus removing the need for uncomfortable, visible metal braces. A course of free tooth-whitening is offered as part of the Invisalign treatment at Monkmoor Dental Practice.

As a patient at Monkmoor Dental Practice, you can look forward to continuing investment in the products offered, such as hygiene services and dental implants. Finance facilities will shortly be available to patients in case of need.

We are committed to offering the best dental care possible to our patients and the experienced team at Monkmoor Dental Practice looks forward to welcoming you, so call today on (01743) 351419 to book your private consultation.
